

Developer Task: UI – Responsive Design

 **Deadline:** 3–4 hours from the time of assignment

Objective

Recreate the UI using:

- React.js
- TypeScript
- Tailwind CSS
- ShadCN UI
- Must be **fully responsive** across mobile, tablet, and desktop.

Tech Stack

- React 18+
- TypeScript
- Tailwind CSS
- ShadCN UI
- React Router
- Vite (preferred)

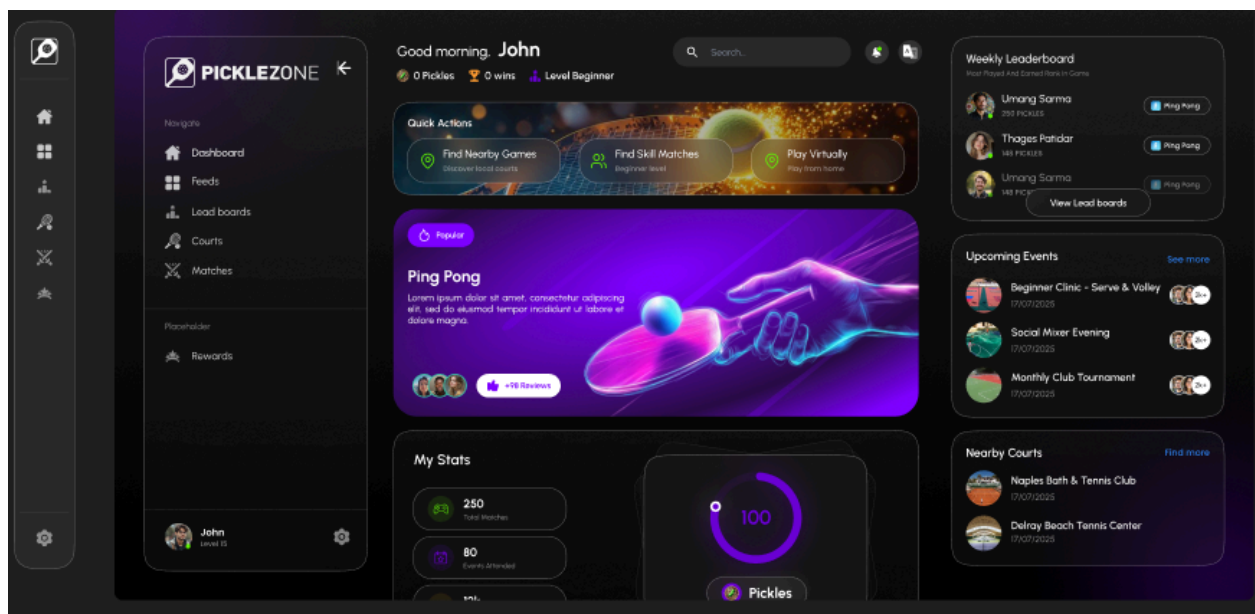

Task Summary

You are required to build **two separate screens** based on the attached UI screenshots:

- **Dashboard Screen**
- **Signup Screen**

The final implementation must:

- **Match the UI design exactly** (including colors, layout, fonts, shadows, gradients, etc.)
- Be **fully responsive** (mobile, tablet, desktop)
- Use the **exact same theme** and look as shown in the screenshots
- Follow a **clean and modular folder structure**
